

## **Region 3 GPRA Baseline RCRA Corrective Action Facility**

# **Harley-Davidson Motor Company Operations, Inc.**

**1425 Eden Road  
York, PA 17402  
Congressional District 19  
EPA ID #: PAD001643691  
Last Updated 7/2/2003**

## **Current Progress at the Site**

This facility is one of EPA Region III's priority RCRA corrective action sites. In May 2002, Harley-Davidson Motor Company Operations Inc. ("Harley-Davidson") agreed to participate in EPA Region III's Facility Lead RCRA Corrective Action program. The terms of this participation are outlined in a Facility Lead Agreement (see EPA Region III RCRA Corrective Action Web Site). Substantial investigations and actions have been already been undertaken at the facility.

As an initial step in the Facility Lead Corrective Action process, Harley-Davidson and EPA are in the process of developing a RCRA Facility Investigation (RFI) workplan. The RFI workplan will outline the next phase and/or balance of investigation work necessary to meet RCRA Corrective Action requirements at the facility. Other ongoing activities which are considered part of an RFI include the performance of a well survey and the development of a vapor intrusion evaluation workplan.

## **Site Description**

Harley-Davidson owns and operates this motorcycle manufacturing facility on a 230-acre site located in York, PA. Prior operations on the property included a Naval Ordnance Plant owned and operated by the United States Department of the Navy. The plant reportedly manufactured non-explosive ordnance items. In January 1995, Harley-Davidson and the United States Department of the Navy ("the Navy") entered into an agreement whereby both parties agreed to share the costs for investigation and remediation of any releases or potential releases of hazardous substances/wastes at the facility. This agreement provides that corrective measures at the facility be in substantial compliance with the National Contingency Plan. Extensive cleanup actions taken to date at the facility include the installation and operation of a groundwater pump and treat system and a soil vapor extraction system.

## **Contaminants**

---

Primary organic contaminants include trichloroethene (TCE), tetrachloroethene (PCE) and 1,1,1-trichloroethane, Inorganic contaminants include chromium and lead.

## **Site Responsibility**

---

RCRA Corrective Action activities are being conducted by Harley-Davidson under EPA Region III's Facility Lead Program with the cooperation of the Navy and the assistance of the Pennsylvania Department of Environmental Protection. .
